

## **CS 286A**

FA 2013-14

Advanced Topics in Data Privacy: Prerequisites: CS/SS 152, or the permission of the instructor. 9 units.

This is a graduate-level seminar. The course will focus on recent literature in differential privacy, e.g., private mechanism design, privacy-preserving streaming algorithms, geometric approaches to privacy, and cryptographic lower bounds. Students will pursue a substantial research project.
