

**PL 102 - Selected Topics in Philosophy:
Philosophy in the Eighteenth Century: Kant on Science and Philosophy**

SP 2010-11

Taught by Marius Stan. T 7-10p G only, Maximum Enrollment: 12 students, Open to juniors and seniors only

This course is a survey of Immanuel Kant's thought on exact science, philosophy, and the relation between them. Topics include: Kant's views of the architecture of matter; the nature of space and time, force and motion; the methods of mathematics and physics; the conceptual structure of classical mechanics; a priori knowledge and empirical science; the nature and limits of metaphysics.
